

SUPERIOR STUCCO ARCHITECTURAL FOAM

GLOSSARY

Potshelf (Sill) - Typically are used at the base of a window, and are specifically designed for this application by having a slope to allow water to run-off.

Sashes & Bands (Casing) - Typically are used on the sides of windows or doorways, and are usually installed in areas where water run-off is not needed.

Eaves & Crowns (Cornice) - Typically used under roof overhangs/eaves or where your interior wall meets your ceiling. The back is usually cut to allow for adjustment and easier installation.

Faux-Crete Moldings - These do not always need to be ordered with our Faux-Crete Finish, however, the section in this catalog also known as our *FC Series*, displays some of our more popular styles offered.

Wall/Post Caps - Typically used to finish off the top of fence/retaining walls and posts/columns.

Pediments - Typically used over a doorway, window or walk way. Pediments offer more detail than a standard surrounding shape.

Arches - Typically are used to add detail or dimension to an area such as a window or doorway, where an arched window/door may be.

Quatrefoils/ Bullseyes - Can be used to surround a circular window, light fixtures, attic vents, or to add detail to a bare wall.

Columns - Usually surround a structural post, adding detail to the overall appeal of the home or building. Columns can also be used to add detail to a corner of a wall or building providing the same detailed effect.

Shutters - These low maintenance, elegant shutters are economical and last a lifetime with no maintenance, unlike wood shutters. EPS coated foam resists rotting & termites.

Quoins - Quoins are often used as decoration, defining space by visually outlining the geometry of a building. Typically on the outside corners of a building.

Keystone - Helps to add a stylish touch to interior or exterior windows, doors and arches.

Every shape can be customized, with lots of finish options. Not all shapes are in stock and may take up to 10 business days for custom shapes.
