

SUPERIOR STUCCO ARCHITECTURAL FOAM

STANDARD AND CUSTOM FOAM FINISHES

All of the shapes in this Guide are examples of Standard & Custom Shapes offered by *San Jose Stucco Supply & Drywall*. Any of the shapes featured in this catalog can be modified to meet any specification you may need.

Please inquire with our sales staff for further details.

We currently offer Six (6) different finishes:

1. **Sand Finish**: A Base Coat with floated texture. This finish is for exterior use and our most economical.
2. **Faux-Crete**: A smooth hand-sanded, two-coat process, which can be used for both interior and exterior.
3. **FC-90 or Interior**: Also a smooth, hand-sanded, two-coat process for interior use. Recommended for low impact areas.
4. **Rock-Crete**: One of our newer finishes that offers an imperfect “*Old World*” appeal to it’s texture. This two-coat finish can be used for either interior or exterior.
5. **Limestone**: Our Thickest two-coat finish which offers the look of natural “*Old World*” limestone.
6. **Wood Grain**: Becoming more and more popular, the Wood Grain finish looks great on Shutters.

Every shape can be customized, with lots of finish options. Not all shapes are in stock and may take up to 10 business days for custom shapes.
